Overall performance (circle one)  
Comments: \_\_\_\_\_

Exceeds Expectations

Above Average

Satisfactory

Needs Improvement

Emily completed her 3 week rotation on the ICU, CCU,

Psych and 2 APG Units. She was able to assess the nutritional needs of tube feed, orally feed and TPN patients. Emily was able to follow the TPN / diet progression of a patient with short bowel syndrome. During her rotation we discussed acid-base balance, Indirect calorimetry, CRRT protein requirements and many more critical care concepts. Emily was always willing to complete chart notes as assigned. Emily interacted well with other care team members (RN's + MD's). Overall Emily did a great job during this rotation and she will now have 2 weeks of staff relief covering ICU, CCU, Psych and 2 APG.
